(67%) units have installed effluent treatment plants and the remaining 39 (33%) units are closed. Under the Ganga Action Plan Phase I which has since been completed, about 35% pollution of Ganga has been tackled. The remaining 65% pollution is to be tackled under the Ganga Action Plan Phase II which is under implementation and is scheduled to be completed by the year 2005. To check the pollution from tanneries at Kanpur, common effluent treatment plants have been constructed at Jajmau (Kanpur) and Unnao. Those tanneries which are not covered under the common effluent treatment plant have also installed primary and secondary treatment facilities. A total of 851 grossly polluting industries have been identified throughout the country. Out of these, 589 units have installed effluent treatment plants, 228 units are closed and 34 units are defaulting against which legal action has been initiated by the respective state pollution control boards.

WRITTEN ANSWERS TO UNSTARRED QUESTIONS

Production capacity of Urea producers
